RAY ANGELO B. AGUILOS

Information Systems Graduate | Web Developer | Business Analytics | Machine Learning

ray.aguilos662@gmail.com | +639062421692

SUMMARY

Information Systems graduate specializing in Business Analytics with experience in web development and applied machine learning. Currently pursuing a Machine Learning Internship focused on real-world search and analytics data, including embeddings, clustering, intent classification, opportunity scoring, and insight-to-action reporting. Strong foundation in data analytics, business analytics, web development, and project management.

EDUCATION

Technological Institute of the Philippines – Quezon City
Bachelor of Science in Information Systems, Specialized in Business Analytics
2021 – 2025

EXPERIENCE

Machine Learning Intern | FlyRank | July 2026 – Present

- Work with real-world search and analytics data to develop applied machine learning solutions.
- Apply machine learning techniques including embeddings, clustering, intent classification, and opportunity scoring.
- Analyze search data to identify patterns, opportunities, and actionable insights.
- Translate analytical findings into insight-to-action recommendations that support data-driven decision-making.

Web Developer Intern | Redwizard Events | March 2025 – May 2025

- Maintained and optimized company and event websites to ensure functionality and updated content.
- Developed and launched WordPress-based websites for brand and event requirements.
- Integrated plugins and APIs to enhance website features including registration functionality.
- Managed registration databases through data extraction, organization, and processing.

PROJECTS

CarGo: Progressive Web Application for Car Rental Service

- Developed a progressive web application with booking, vehicle management, payment, and analytics features to improve car rental operations.

IoT Conference Website

- Developed and maintained an event website using WordPress, integrating website features and registration functionality to support conference operations.

SKILLS & INTERESTS

Technical: Python, Java, SQL, HTML/CSS, WordPress, Machine Learning, Data Analytics, Business Analytics, Database Management, Web Development, Progressive Web Applications
Laboratory: Eclipse IDE, Oracle Live SQL, Visual Studio Code, WordPress CMS, Google Analytics
Languages: English (Fluent), Filipino (Fluent)
Interests: Web Development, Emerging Technologies, Artificial Intelligence, Data Analytics, Project Management, Technology Innovation

CERTIFICATIONS
